Purpose:
To define the process and protocols for transferring consumers to services which more appropriately meet their individual needs and medical necessity.

Scope:
This procedure applies to all employees (including full-time and part-time employees), contract clinical providers, volunteers, students, and/or interns of Huron Behavioral Health (HBH) and all consumers served.

Information:
- HBH makes every effort to place consumers in the most appropriate and least restrictive services possible and to meet the medical necessity guidelines as defined in the Michigan Medicaid Provider Manual.
- A consumer’s services are determined and authorized through the Person Centered Planning (PCP) process (see also “Person Centered Planning Policy” QI.1.05 and “Person Centered Planning Process and Individual Plan of Service (IPOS) Procedure” QI.2.18). An Individual Plan of Service (IPOS) is developed which identifies the treatment needs. As needs change throughout the course of treatment, additional services or reduced services may be appropriate. When services change, the primary worker must complete a referral record in the Electronic Medical Record (EMR) to document the changes in service(s).

Policy:
1. The primary worker is responsible for determining when a referral or transfer is appropriate and also for documenting all referrals and transfers in the consumer’s case record. Specific cases should be discussed during clinical staff meetings and with the program supervisor, as well as with other program supervisors who are impacted by the referral/transfer. The primary worker, their supervisor, and the receiving program supervisor will typically meet to discuss the referral/transfer and to review the need based on the consumer’s progress toward their goals and evaluate the need for:
   - Current services
   - Changing services to a more intensive service program
   - Changing services to a less intensive service program
   - Referring the consumer to services outside of the agency

2. If it is determined that a consumer no longer requires a current service, the treatment team will review the case, determine recommendations, and implement the necessary transition and follow-up activities.

3. Current services should continue until the consumer begins receiving the recommended services.

4. If services defined in the individual’s IPOS are reduced, suspended, or terminated, Medicaid consumers must be notified in writing at least ten (10) calendar days prior to the proposed effective date (note – for General Fund consumers the requirement is 30 days before the action occurs) using the Adverse Benefit Determination Notice (see “Forms” section below). (See also “Grievance and Appeals Procedure” RR.2.36.)

5. The Primary Worker must complete a “Transfer/Referral Form”.
